Military Service: Completed (Oct 2024 – Dec 2025)

PROFESSIONAL SUMMARY

Frontend Engineer with experience building client-facing web applications and production-ready React solutions. Skilled in React, JavaScript (ES6+), Tailwind CSS, REST API integration, responsive UI development, and clean component-based architecture.

EDUCATION

Bachelor of Computer Science — MTI University, Egypt | 2024

Graduation Project: Secure Image Copyright Protection

Built a digital watermarking system using Python, React, and Tailwind CSS to protect image copyrights while preserving visual quality.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), React.js, Node.js, Express.js, C++, HTML5, CSS3, Tailwind CSS, Framer Motion.

Build & Tooling: Vite, Git, GitHub Actions, Vercel

Databases: MongoDB, PostgreSQL

Testing&APIs: REST APIs, Postman, Jest

UI & Design: Figma, Responsive Design

Concepts: OOP, Data Structures & Algorithms

WORK EXPERIENCE

Co-Founder & Frontend Developer — Norque Studios, Cairo, Egypt | 2026 – Present

- Co-Founded a digital agency delivering premium web solutions for international clients in collaboration with UI/UX design partners.
- Delivered a full website for **FusionForm**, an architectural firm, including a project showcase and a careers page for job applications, resulting in a client contract extension for ongoing maintenance and updates.
- Built a B2B website for **MAKH Horizons**, an international trading company, featuring product listings, compliance certifications, and a partner inquiry form to support their global logistics coordination services.

PROFESSIONAL TRAINING

Postgraduate Diploma in Full Stack Software Development Information Technology Institute (ITI), Completed Nov 2025 Covered the full MERN stack alongside Next.js, Agile methodology, and UI/UX principles.

Frontend Development Bootcamp Information Technology Institute (ITI), Completed Sep 2022 Focused on HTML, CSS, JavaScript, and React fundamentals.

Software Engineering Mentorship 6-Month Structured 1:1 Mentorship with Former Senior Software Engineer at Microsoft

- Weekly mentorship focused on code reviews, software architecture, SOLID principles, design patterns, and system design fundamentals
- Applied architectural feedback to real projects to improve code maintainability and engineering decision-making
- Received guidance on software engineering career growth and corporate development practices

CERTIFICATES

- Ultimate React Course by Jonas Schmedtmann (Udemy)
 - Algorithmic ToolBox course (UC San Diego through Coursera)
 - Networking Basics Course (CISCO)
-

PROJECTS

FusionForm – Architecture Firm Website — [Live Site](#)

React, React Router, Framer Motion | Freelance Client Project

- Built a production-ready website for an architectural firm, including a project showcase and a careers page for architectural engineers to apply
- Debugged and resolved Vercel SPA routing and deployment issues, resulting in a contract extension for ongoing maintenance and updates
- Reduced initial page load time through lazy loading and asset optimization, Implemented scroll animation, and project category filtering using useSearchParams

MAKH Horizons – B2B Trading Company Website — [Live Site](#)

React, React Router, EmailJS, React Hook Form, GA4 | Freelance Client Project

- Developed a B2B website for an international trading and business solutions company, showcasing products and quality assurance/global compliance certifications
- Developed a partner inquiry form allowing prospective companies to submit requests to start business, supporting the client's global logistics coordination services
- Optimized site performance to achieve a 95+ Lighthouse score

Clinical Care Management System — [GitHub](#)

React, JavaScript, REST APIs, Node.js | ITI Graduation Project

- Architected a role-based healthcare platform serving three user types (admin, doctor, patient) with protected routing and session-based auth
- Built an AI-powered symptom analyzer integrated via REST API, handling async state, loading states, and error boundaries
- Owned the full frontend — component architecture, API integration, and responsive layouts and presented technical design and UX decisions to faculty

Custom Invoice Management System — [GitHub](#)

React, JavaScript, CSS, JSPDF

- Built a custom invoice generation system for agency clients using React, enabling dynamic invoice creation, automated pricing calculations, and downloadable PDF client-ready invoices.
- Implemented reusable form components, input validation, and state-driven invoice updates for efficient invoice management.

E-commerce Web Application — [GitHub](#)

React, JavaScript, CSS, REST API Integration

- Developed a responsive e-commerce application using React with product browsing, filtering, cart management, and checkout functionality.
 - Integrated API-driven product data and implemented state management for cart and user interactions.
-
